## STOCKS OF GRAINS JANUARY 1, 1956 WITH COMPARISONS

The Crop Reporting Board has assembled from various sources the following information on stocks of grain in all positions:

| Grain | Position | Jan. 1 1954 | Jan. 1 1955 | Oct. 1 1955 | Jan. 1 1956 |
|---|---|---|---|---|---|
| | | Thousand bushels | | | |
| Wheat | (On Farms 1/ | 423,068 | 321,321 | 428,541 | 320,800 |
| | (Terminals 2/ | 316,765 | 374,369 | 448,678 | 403,181 |
| | (Commodity Credit Corp. 3/ | 44,674 | 131,366 | 140,746 | 141,056 |
| | (Merchant Mills 1/ 4/ | 123,467 | 126,382 | 141,403 | 126,878 |
| | (Int. Mills, Elev. & Whses. 1/5/ | 424,292 | 517,943 | 594,312 | 543,101 |
| | TOTAL | 1,332,266 | 1,471,381 | 1,753,680 | 1,535,016 |
| Rye | (On Farms 1/ | 6,662 | 9,582 | 20,102 | 14,048 |
| | (Terminals 2/ | 11,028 | 10,940 | 8,932 | 8,369 |
| | (Commodity Credit Corp. 3/ | --- | 1,714 | 1,687 | 29 |

| | TOTAL | 79,196 | 192,751 | 74,377 | 222,456 |

1/ Estimates of the Crop Reporting Board. 2/ Commercial stocks reported by Grain Division, AMS, at 44 Terminal cities. 3/ Owned by CCC and stored in bins or other storages owned or controlled by CCC, also CCC-owned grain in transit to ports; other CCC-owned grain is included in the estimates by positions. 4/ Mills reporting to the Bureau of the Census; on millings and stocks of flour. 5/ All off-farm storages not otherwise designated for each grain.

Agriculture-Washington

# GRAIN STOCKS CONTINUE AT RECORD LEVELS

January 1, 1956, stocks are a record for January 1 for wheat, corn, oats, sorghum grain, and barley. Wheat stocks of more than 1.5 billion bushels and corn stocks of 3.1 billion bushels exceed the previous record by 4 and 8 percent, respectively. Stocks of feed grains--corn, oats, barley, and grain sorghum--add to a total of 116 million tons--the largest in the 11 years for which comparable records are available. These data on stocks in all positions are assembled by the Crop Reporting Board from various sources--stocks at terminals as reported by the Grain Division of the Agricultural Marketing Service; grain reported by Commodity Stabilization Service as Government-owned grain stocks in bins and other storage under CCC control and in transit; estimates of the Crop Reporting Board for stocks on farms, at merchant mills, and at interior mills, elevators, and warehouses.

Stocks of 1,535 million bushels of wheat stored in all positions on January 1 were the largest for the date in the comparable series beginning in 1935. The total is 4 percent larger than a year earlier, the previous record holdings, and 70 percent larger than the 1945-54 average. The stocks total was nearly two-thirds larger than the 1955 production, reflecting the record large carry-over of old wheat on July 1, a large part of which was Government owned. Current stocks are less than October 1, 1955 stocks by 219 million bushels or nearly 13 percent.

Off-farm wheat stocks of 1,214 million bushels, 6 percent larger than a year earlier, were a record total for the date with holdings at record levels for all off-farm positions except merchant mills. In contrast, farm stocks of 321 million bushels on January 1 were slightly below a year ago and the smallest for the date since 1950. Of the off-farm total, about five-sixths was either owned by the Commodity Credit Corporation or was warehouse stored wheat under Government commodity loans. About one-fourth of the total wheat on farms was under Government commodity loans.

The off-farm total includes 127 million bushels at merchant mills, 543 million bushels in interior mills, elevators, and warehouses, and 403 million bushels commercial stocks at terminals. The Commodity Credit Corporation had 141 million bushels of wheat stored in bins under CCC control, aboard ships in the "mothball fleet", and in transit to ports--a record total for the date. Other Government-owned wheat is included in the estimate for the postion where stored.

Rye stocks of 28.8 million bushels in all positions on January 1 were the largest since 1944 and 11 percent larger than stocks a year earlier. Farm stocks of rye totaling 14.0 million bushels, the largest since January 1943 and 47 percent larger than a year earlier, accounted for almost one-half of the total stocks. Stocks of rye at interior mills and elevators reported at 6.4 million bushels were the second highest of record and almost three-fourths larger than holdings in these positions a year earlier. Rye stocks at terminals of 8.4 million bushels were 24 percent smaller than on January 1, 1955, while holdings in CCC bins were quite small. Stocks on farms and at interior mills and elevators accounted for about 70 percent of the total stocks.

Stocks of corn in all storage positions on January 1 were at a record level of 3,057 million bushels and well above the previous high of 2,825 million bushels on January 1 a year ago. About 30 percent of the current total stocks are under loan to or owned by the CCC. Stocks on farms at 2,191 million bushels are only about 5 percent above a year ago but off-farm stocks are 18 percent larger. Nearly 212 million bushels of corn are in interior mills, elevators, and warehouses, more than one-third above the previous record of 156 million bushels a year ago. The CCC has a record total of 583 million bushels stored in its own bins compared with 516 million a year ago. Corn in terminals at 72 million bushels is also an all-time high and compares with 60 million a year ago. From the October 1 supply of 3,886 million bushels of grain corn, disappearance during the October-December quarter is indicated at 828 million bushels, 7 percent above the 775 million bushels during the corresponding quarter a year ago, but less than other recent years.

Oats stocks of 1,082 million bushels were largest of record for January 1, exceeding the former high of 1946 by a slight margin. They are about 7 percent larger than January 1, 1955, stocks. Both farm stocks and off-farm stocks were record high. Disappearance of oats since October 1 of about 302 million bushels was largest for the quarter in 10 years.

Stocks of barley in all storage positions on January 1 were a record 303 million bushels compared with 283 million bushels a year ago. About one-third of the present stocks are under loan to or owned by CCC. Barley stocks on farms at 190 million bushels are 15 percent above a year ago but off-farm stocks are 4 percent lower. Interior mills, elevators, and warehouses had stocks of 87 million bushels on January 1 compared with 84 million bushels a year ago. Total disappearance of barley during the October-December quarter was 98 million bushels compared with about 73 million bushels during the same quarter a year ago.

Sorghum grain stocks in all positions on January 1, totaling 222.5 million bushels, are the largest of record. They exceed last year's stocks by 15 percent and compare with 213.1 million bushels, the next largest stocks, held on January 1, 1951. Stocks in Texas account for more than three-fifths of the total with another fifth in Kansas.

Stocks in interior mills, elevators, and warehouses are record large and represent more than half the current total. Farm stocks are the largest in five years, and terminal stocks are the second largest of record. About 56 percent of the January 1 stocks were owned by or under loan to CCC.

## STOCKS OF GRAINS JANUARY 1, 1956
